

Moving or re-licensing your software

If you have already purchased a software product from us and are subject to an existing End User Licence Agreement and want to transfer that software to another computer, or have had a significant hardware change on your computer which has affected your use of the software, or have had to re-install your operating system, then please fill in our software license transfer form [software_license_transfer_form.pdf](#).

We reserve the right not to provide replacement software (and will in any event provide a maximum of 3 re-activations only per product). The terms of your End User Licence Agreement will continue to apply save to the extent that we agree otherwise in writing.

If we agree to re-licence, our terms for re-licensing your software are:

1. We will do this for 'free' once per year
2. Thereafter we charge a £25 fee inclusive of VAT to cover the administration of the re-licensing process.
